2020-2021 School Year By the Numbers

 Audience:
 Reynolds School District community (families, staff, Board) and the general public.

 Purpose:
 The 2020-2021 School Year By the Numbers infographic was created to showcase the hard work that Reynolds staff put in during the 2020-2021 school year and to celebrate our achievements. During a year full of uncertainty and upheaval, we wanted our community to know that families and staff were working diligently to continue learning, communicating, and staying healthy while working through seemingly insurmountable obstacles due to the COVID-19 pandemic.

 Method of Delivery:
 The infographic was sent to all staff and families via our communication channels, posted on district and school websites, featured on social media, and printed for posting in district buildings.

 Key Messages:
 The 2020-2021 School Year By the Numbers infographic included information on device/hotspot distribution, health and safety precautions, hiring of additional support staff, transportation upgrades, and meals served. It also included data on the amazing job that our staff did staying connected with families, such as through virtual meetings, Remind app messages, and social media engagement.

 A lot of the work that staff did during the COVID-19 lockdown wasn’t visible to families and the community due to the closing of school buildings, and we wanted to make sure that the intensive behind-the-scenes efforts achieved by internal staff were recognized.
