We need everyone in Spring ISD to join us in our commitment to keeping students safe! During National School Bus Safety Week, we shared helpful tips and important information regarding students’ safety, both on and around the bus.

The Office of Communications collaborated with the Spring ISD Police Department and Office of Transportation to create a video project stressing the importance of school bus safety.

The video was hosted by the district’s police chief and our head of transportation so that our viewers could see the people who actively work to keep our children out of harm’s way.

While this video was intended for drivers and students in our local community, it certainly offers useful information for any viewer, regardless of their location.

The video project has been viewed hundreds of times and has received many positive responses from our viewers.
